### **E6 - Grotta**

E6-Grotta

The author visited E6-grotta finally with some friends in 2015. The fossil and phreatic cave is only about 20 m from the main road, which of course is the reason for its name. The cave is surveyed to a length of 11.2 m and a total depth of 3.2 m, although with some possibilities of extension by digging.

The article quotes some memoranda about the cave.
