Løvstadgrotta, Gråtådalene, Beiarn, Nord-Norge, an Annotated Bibliography

Løvstadgrotta, Gråtådalene, Beiarn, Nord-Norge, an Annotated Bibliography

A 1966 description of Løvstadgrotta by the late Shirley St. Pierre was translated into Norwegian and published in Norsk Grotteblad nr. 66, juli 2016. Shirley and the compiler first visited Gråtådalene in 1963 when they started to collect information about Norwegian caves. The 126 annotated entries in the Løvstadgrotta bibliography are presented in chronological order to provide a sense of the history of exploration and study and are classified to facilitate searches for references to the subject matter of interest. The earliest references date back to 1862, 1897 and 1903. Norwegian, British, French, Polish, and Spanish references are included. The greatest number are by Beiarn Grotteklubb members. Thanks to the support received, most of the publications are held in the NCIB
