### **Jakten på en svensk grotteklassiker**

The hunt for "a classic Swedish cave".

In June 2009 Sven Gunnvall wrote about "10 Svenska klassiker" in Grottan (the SSF magazine): Voitasgallo, Sotsbäcksgrottan, Korallgrottan, Skallbergsgrottan, Rackebergskyrkan, Hoverbergsgrottan, Bodagrottan, Östra Klövbergsgrottan, Lummelundagrottan and Balsbergsgrottan.

This article is about fulfilling the dream from that time of three Swedish guys who travelled through Sweden in 2018 to visit these "ten classic Swedish caves" where each cave has its own geological history and development.

On their journey they used car and helicopter to reach the caves. They also joined the Summer Norwegian meeting in Plurdal where Jordbrugrotta was the favourite.

However there are other marble caves here which were also fascinating due to their colour, scallops, razor-sharp stones and the rock foliation on walls.
