Vancouver Island "Tunnel Vision" Februar 2019

Vancouver Island: «Tunnel Vision», February 2019

This article describes the vacation of a member who went caving on Vancouver Island with local cavers. Different countries have different manners, for example they took a long ladder inside the cave. In this beautiful cave it was very useful for getting up high into avens. Everything went well, except one of the cavers forgot to take off his harness before leaving the cave, in the cold outside it froze immediately.
