Grottedykking på Skrim

Cave diving in the Skrim area

The authors, three very promising Norwegian cave divers describe their very first cave dive. The dive was carried out in the fall of 1983 when the sump between upper and lower Sandåggrotta (4-5 m) was dived. This sump and other Caves in the Skrim area have been dived by British cave divers Barry Wilkinson, Andrew Ive and Douglas Nash in 1980.
