Slaraffenland

SLARAFFENLAND

A brief story on the everyday life in the permanent camp named Slaraffenland within the Greftkjelen cave near Bodø. The cave is normally visited by BOBTOG members between Christmas and New Year for up to 4 days.

To get to the camp one descends 170 m most of which comprises the entrance ice-slope and the Vertical pitch of some 50 m. Sleeping in Slaraffenland makes it easier to carry on the exploration of the inner part of the cave, including the yet unacended "Himmelstigen" (Heavenly ladder) shaft.
