Grotting i Tromsdalen

CAVING IN TROMSDALEN

These Tromsdalen caves were first visited by the author in his boy scout days with the result that angry mothers banned such pursuits.

The caves Nergrotta and Øvergrotta are the biggest on the perforated plateau.

The former has a 3 m pitch near the entrance. It gets tight and offers an A-4 size exit.

Øvergrotta has a wet section which is a nice streamway passage surveyed to a pool at 65 m and a dry section which remains to be surveyed.
