

## **Norsk Grotteblad nr 24, August 1992**

### **Grottenes verdi**

The author focuses on what is meant by a caves value. The caves are divided into different categories: Recreation, physical exercise, aesthetic experience, education, hobby, research and tourism. The value of a cave depends of which category one is looking from. On common feature is that the cave must be accessible. "The picture" on page 20 is an ironic example of a cave hall that isn't discovered.
