Beiarn - stedet som har innendørs isklatring

Beiarn - indoors ice-climbing

Five cavers from BOBTOG and STUF went through the Rønnali system in Gråtådalen in Beiarn, from the entrance at Smiths Cave to the exit at Rønnalihølet, on the 5th. of March. The trip was a great experience as the river and pitches were frozen. The trip became almost an indoors ice-climbing expedition, viz. front cover.
