

Norsk Grotteblad nr 38, Mai 2002

Norgessamlingen 2001

The Norway meeting 2001.

The one-week meeting started on August 3 in Bonådalen in Sørfold with the exploration of Tjoarvekalken. After a few days we transferred to Røvasdalen in Rana. Edvardheimgrotta was explored and mapped. Further penetration may be possible.

Rune Magnusson reported from the UIS-congress in Brazil 2001. On August 11 Hilde Thoresen gave a course in first aid with emphasis on typical situations which may arise in caves.
