NGRT - fortid, nåtid og fremtid. Evaluering av grotteredningsseminaret

National Cave Rescue Service - past, present and future. Evaluation of the cave rescue seminar.

The seminar was evaluated by a questionnaire (score 1-6) to the participants. The scores were satisfactory, with a mean of 5.5 for the statement "The seminar as a whole has been interesting". There is a need for more such seminars, perhaps with an interval of 2-4 years.

A graph shows the financial support from the Department of Justice for the years 1991-2001 - amount applied for and amount granted. A total of 265,000 kr. has been received since 1991. Future development of the Service is dependent on this support, but also on the willingness of cavers to give of their time and energy to the work.
