Grotteutstillingen Bergtatt

Cave exhibition "Bergtatt"

In the summer of 2004 Rana Museum had a fine exhibition dealing with caves in Nordland. The exhibition was put together by geologist Barbare Priesemann at the museum's department of natural history.

Text, pictures and caving equipment informed about cave formation, cave morphology, mapping, bats and other animals and much else. A bear skull was on view. The vulnerability of caves was emphasized.
