Funn i Dunderlandsdalen

Finds in Dunderlandsdalen

Søppelgrotta is a small cave at the E6 bridge, Storforshei.

Helveteshølet lies near Tørrbekkmoen north of the dehydrated Ørtvatnet lake. The cave is waterlogged beyond two small pitches for much of the year. It is threatened by quarrying.

Dig near Eiteråga. Two draughting holes in the Eiteråga dry valley turned out to be a long-time project.
