Tjorve 2006

Tjorve 2006

Exact length of Tjorve at the end of 2006 is 20.162 metres, according to the Excel spreadsheet. The length was reported to caverBob 16.8.06. For first time Tjorve is amongst the 200 longest caves in the world, according to caverBob. At the end of 2006 Tjorve was number 196. Thanks to Polish cavers, the cave Stoppenålen is now 496 metres long and 195 metres deep. The vertical distance to Tjorve is still long, approximately 74 metres according to Survex. The polish surveyed the cave Blåsehullet as well. The length is 92 metres. The survey sketches have been scanned. The first 300 metres of Stoppenålen have been drawn using Therion.
