

Fjellelvsprekka - nytt lovende grottefunn i Troms

Fjellelvsprekka - an interesting cave discovery in Troms

Fjellelvsprekka is a recently discovered cave in the Cazajávri area between Skibotndalen and Signaldalen in Storfjord kommune, Troms. The cave has unusual many entrances (15-20) and is estimated to be at least 1000 meters in length. From sink to outlet the distance is 1050 m with three parallel passages most of the so far explored part. The expedition members, Tore Brattli, Jan Thomas Schwenke, Are Mellem and Harald Bohne are planning to survey the cave in April 2008.
