

Jordbekkgrotta

Jordbekkgrotta

The cave is partly submerged, and it have been dived and surveyed for more than 1 km. An English team surveyed the dry part in the sixties. The cave is situated in Virvassdalen, east of Krokstrand. Drive 4 km into the valley; take right just after passing Tomasstranda. Cross the river and go south uphill for one kilometre until you find the resurgence of Jordbekken. Then another kilometre SE uphill to the main entrance.
