Svarthammargrotta

Svarthammargrotta

This cave is situated close to Kvitgrotta, SE of Fauske. The entrance is easy to see from the parking site. Follow the way to Kvitgrotta and go on upwards for another 5 minutes. The entrance is on a mountain shelf; take care for the steep mountainside! A hand line may be used. After a very roomy entrance hall, the cave seems to close down, but just look for the way on! You might find another way out.
