Beinhola og Navnløsgrotta

Beinhola and Navnløsgrotta

Beinhola is 1 km further to the southwest along the path. Its main features are a wide opening and a boulder-strewn hall.

Navnløsgrotta is a pleasure to any caver and easy too. It has a total length of some 400 m of which 300 m is a broad main passage. There are signs of bears' resting places in a side passage 40 m from the entrance. The entrance is found immediately below a cliff 100 m from the path.
