

White-Nose Syndrom (WNS) i Europa?

White-Nose Syndrome (WNS) in Europe?

Because no information and recommendations concerning the WNS in Europe were spread among European cavers, the FSE WNS workgroup created a fact sheet on WNS. This document has been translated into Norwegian and published in this journal. The goal is to avoid the spread of WNS in Europe and also to gather more information on this syndrome in Europe.

If you are visiting caves in Norway, please ensure that equipment is thoroughly cleaned and disinfected prior to use.
