Avmagnetisering av batterier i DistoX

De-magnetising the batteries used in the DistoX

Can there be a purpose in de-magnetising the batteries used in the DistoX, to prevent some of the difficulties with the compass of the instrument? In this article, Hans Øivind Aarstad tells of his experiences when trying to solve this problem. He partly succeeded, but still recommend regularly calibration of DistoX. In addition, there are a couple of links to websites where the issue has been discussed.
