En liten tur med mange små

Caving with children

On Wednesday 18th of May 2011, Barnas Turlag (= app. Children's Hiking Club) arranged a trip for the youngest ones to the old German Military Underground Installations in Rønsvika (outside Bodø). 38 persons, including parents, showed up at the parking lot. They were so many that the guide decided to divide the group into two teams. Then they all went underground, exploring the dark tunnels of the first underground installation. The second one, though, was disappointing, because the entrance was blocked. Everybody was happy and satisfied at the return.
