

Røverhula på Løvøya ved Horten

Røverhula on Løvøya at Horten

There are not many caves in the Vestfold county. Røverhula (Robber's Cave) is located in Veggefjell on Løvøya in the Oslo Fjord. The cave length is 16 meters. It is located 60-68 m above sea level, and is, more or less, a sea cave.

Calculations using formulas to Påsse (2005) showed that it is 8250 years ago sea since the level was at Røverhula (60 m) and 9000 years ago at 68 m. The shoreline raised about 0,9 m/century at the time when Røverhula was created.
