

Konsesjonssøknad, Styrkesneselva

License application, Styrkesneselva

In the winter of 2011 Nord-Norsk Småkraft AS applied for the concession for the construction of Styrkesnes river power plant in Sørfold Municipality in Nordland. Småkraft committed NGF to examine whether there is or may be caves or other karst objects in the concession area for the envisioned plant, including an inspection. Site visit was conducted 4.8.11. The conclusion for the inspection and other studies is that there is nothing to suggest that there are any karst objects in the area affected by the planes. The report was submitted Småkraft 17.8.11.
