Grottetur på Filippinene

Caving trip on the Philippines

In the fall of 2014, Torunn Karlsen visited the Philippines and the enormous underground cave of Poerto Prinsessa on the group of islands called the Palawan. The Cabayuan River runs underground 8.2 km through the cave, which has a lot of beautiful stalagmites and stalactites. The cave, which is accessed by boat, and has been acknowledged by the UNESCO, has been known by the locals for many years, but was registered in 1987.
