Norwegian Cave Index and Bibliography med supplement fra Grotteindeks for Øs

Norwegian Cave Index and Bibliography with supplement from Grotteindeks for Østlandet

Since 1963 (!) David St. Pierre has worked on the Norwegian Cave Index and Bibliography (NCIB), collecting information about caves in Norway and references to articles, scientific reports and personal information. For some years, Norsk Grotteforbund has cooperated with David in order to continue and supplement his impressive work, and take care of the archive in the future. Cato Sture has decided to update his information on caves in Southern Norway and give it all to David, to be included in NCIB. This has increased the number of registered caves and other objects in this part of the country. The information is not available to anybody; it is handled like all information about vulnerable nature.
