### **Northern Exploration Groups grotteekspedisjon til Nordland 1968**

A review of the report, published in 2020, of NEG's expedition to Rana in 1968. They explored and surveyed Durmålshullet VR 90 m and Dunderhullet VR 125 m in Dunderlandsdal and Saranesengrotta in Plurdal. The 12 man group also visited Larshølet, Grønligrotta, Setergrotta, and Krystallgrotta and camped on Svartisen at the Arctic Circle. The review contrasts the travelling and logistical conditions for British cavers visiting Norway in the early years and now.
