Huleforskning i Leirfjordområdet

The two articles by Johan Olsen are reprinted from Yearbook for Sørfold 1986 and 2001, respectively. The first recapitulates the exploration of caves in Leirfjorden (Bonnådalen), Sørfold, first published by Faulkner, St. Pierre et al., SWETC CC occ. pub. 1977. In the second article, a local inhabitant describes the Tjoarvekraiggje cave in Bonnådalen leaning on information on an article in the Dagbladet newspaper from 1997.
