Burfjellet sør - en avklaring

South Burfjellet - a clarification

Reports from England Suggest that there are caves of considerable length on Burfjellet. Local interest was stimulated, but which is the so-called "Devil's Hole"? After studying the articles by Nick Hawkes and Matthew Tuck it's clear that "Devil's Hole" is the same as "Storligrotta". The origin of the name "Devil's Hole" is uncertain, but can derive from the common local saying "det er djevlesk med høl... der oppe" being misunderstood by Englishmen.
