Smågrotter i Plurdalen

Small caves in Plurdalen

Geittjønngrotta is best reached by track from Solum. Entrance near sink of the Indre Geittjønna stream. The cave consists of Øvergangen and the lower streamway, connected by a small pitch.

Lille Dagroshølet. Access from the Langfjell farms, following the valley from Store Dagroshølet towards the NW. A spacious, sloping streamway closes down after 150 m.

Raufjellhølet lies north of Malmhaugvarden near the sink of one of the Malmbekken feeder streams. A tight passage from an abandoned sink joins the stream, but sumps are soon met.
