Status Tjorve 2008

Status Tjorve

During the period from Thursday the 3rd of July to Wednesday the 9th of July 2008 we carried out 8 surveying trips in Tjoarvekrajgge. The result was many survey legs and many metres, at the same time passing into two blank areas on the map. The total length of the cave is now 21.814 metres. We also did some surveying in the Øvre Navnløsgrotta and Eitersprekka caves. Some of the old ropes in Tjorve have been removed and replaced.
